

SUMMARY

Full-stack developer with 1+ year of professional experience building AI-integrated, production-grade HRMS and ATS platforms. Shipped NestJS + Next.js monorepos with Prisma/PostgreSQL, Vertex AI (Gemini + embeddings), pgvector semantic search, and multi-tenant RBAC from the ground up. Strong foundation in system design, REST API architecture, and Agile delivery.

SKILLS

Languages	JavaScript, TypeScript, C++, Java, SQL, HTML, CSS, Python
Frameworks	NestJS, Next.js, React.js, Node.js, Express.js, Prisma ORM, Tailwind CSS
Databases	PostgreSQL, MongoDB, Redis, pgvector (vector similarity search)
Cloud & AI	Google Cloud Vertex AI (Gemini Flash, text-embedding-004), AWS (Basics), Azure (Basics)
Tools	Git, GitHub, Postman, Swagger/OpenAPI, BullMQ, Docker (Basics), VS Code
Concepts	REST API Design, JWT/OAuth, RBAC, Multi-tenant Architecture, Agile/Scrum

EXPERIENCE

Jr. Full Stack Developer

HumanCloud Technologies Pvt. Ltd.

June 2025 — Present

Pune, Maharashtra

- Independently architected and shipped HIRE — a full Applicant Tracking System (NestJS + Next.js 16 + Prisma + PostgreSQL) with 7 modules, 28+ REST endpoints, multi-tenant RBAC (7 roles), configurable approval workflows (sequential/parallel), AI resume screening via Vertex AI, pgvector semantic search, interview scorecards, custom analytics engine, and Brevo email automation — reducing notification volume by ~40%.
- Engineered backend services for large-scale HRMS platforms (Teamcast, Vettly, Pebl) using NestJS, Node.js, Prisma ORM, and PostgreSQL; designed and shipped 20+ production REST endpoints across distributed modules.
- Implemented AI-powered modules — Resume Parsing, AI Interviewer, and Recommendation Engine — using Google Cloud Vertex AI (Gemini Flash + text-embedding-004) and pgvector for semantic candidate matching.
- Built RTL/LTR multilingual support for MENA-region deployment, including locale-aware UI rendering and bidirectional layout handling.
- Optimized backend query performance via indexing and caching strategies, reducing API response time by 30%.
- Contributed to Next.js + React frontend: API integration, UI component development, and accessibility fixes.
- Collaborated in Agile sprint cycles: resolved tickets, performed peer code reviews, and delivered production-ready features on schedule.

Internship Trainee

DRDO – HEMRL, Defence Electronics Lab

Dec 2024 — Apr 2025

Pune, Maharashtra

- Designed and built a remote-controlled surveillance rover for defence reconnaissance — controlled in real-time via a cross-platform mobile application.
- Developed the control app in Flutter (Android Studio), implementing real-time Bluetooth/WiFi communication for live directional control and sensor telemetry display.
- Engineered rover hardware on Arduino: integrated IR and UV sensors for obstacle detection, DC motors with PWM-based speed control, and a live camera module for remote visual feed.
- Delivered end-to-end — hardware assembly, firmware programming, mobile app development, and field testing — within a 5-month internship at a Government of India defence R&D facility.

Project Intern

Infosys Technologies Pvt. Ltd.

Oct 2024 — Dec 2024

Pune, Maharashtra

- Built *HealthCheck Pro*, a full-stack health monitoring system using React, Node.js, Express, and MongoDB, delivering MVP within an 8-week sprint cycle.
- Implemented JWT authentication, dashboard analytics, and health assessment modules; integrated Nodemailer for automated notifications and Redux Toolkit for scalable state management.
- Worked within a 25-member Agile team; owned 3 modules end-to-end from requirement to deployment.

PROJECTS

- MeetBot AI** Next.js, Node.js, Puppeteer, Whisper, Gemini Flash, PostgreSQL, BullMQ2025
- Built an AI meeting bot that autonomously joins Google Meet calls via calendar invite, captures live audio with headless Chromium + FFmpeg, and transcribes speech using self-hosted OpenAI Whisper.
 - Designed an async job pipeline with BullMQ and Redis, scheduling bot sessions triggered by Google Calendar webhooks.
 - Integrated Gemini Flash to generate structured post-meeting summaries (overview, action items, key decisions, sentiment analysis) delivered via Nodemailer and a Next.js dashboard.
- Online Web-Dev Compiler** React.js, Tailwind CSS, Node.js, Express.jsFeb 2024
- Built a real-time in-browser compiler for HTML, CSS, and JavaScript with live preview (CodePen-style); implemented user session storage and code snippet saving via REST APIs and Express.js backend.

EDUCATION

- Bachelor of Engineering, Computer Engineering** ISBM College of Engineering, Pune (SPPU) — CGPA: 8.7/10.00Dec 2021 — May 2025
- Higher Secondary Certificate** ASM’s Geetamata Junior College, Pune — 88%May 2020 — May 2021

EXTRACURRICULAR

- 2023–24 Member, Placement Cell (Nov 2023 – Dec 2024)
- 2024–25 NSS Student Coordinator (Jan 2024 – June 2025)
